IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants: Rex Bunn, et al.  
Serial No: 09/646,993  
Filed: December 11, 2000  
Examiner: T. Tran Lien  
For: TRUSSING POULTRY

Art Unit: 1761  
Confirmation No: 2586

I certify that this **Amendment** is being deposited on June 30, 2003  
with the U.S. Postal Service as first class mail  
addressed to the Assistant Commissioner for Patents, P.O. Box 1450,

**AMENDMENT**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Please enter the enclosed substitute specification which does not include any new matter. The substitute specification is provided both in a clean format and a format showing changes. A new abstract is enclosed.

The foregoing amendments were not made earlier since the need for them was not recognized until the most recent official action.

The substitute specification and abstract were offered in a previous amendment but were not entered on formal grounds. The new specification is necessary to correct formalities, i.e. positioning and naming parts of the specification; incorporating a "Brief Description of the Invention" containing language parallel to original claim 1 and including language setting out the claim for priority.

The abstract is presented to meet the formal requirement for an abstract.

No new matter is added and no new issues are raised.

Claims 1-8 have been rejected under 35 U.S.C. 112 as containing subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the art that the inventors had possession of the invention at the time that the application was filed.

The Examiner is completely in error and the rejection should be withdrawn.

The Examiner states that "the limitation 'said truss being formed of an edible material that remains substantially intact during a cooking process' ... is not supported by the original disclosure. The specification does not disclose anything about the truss remaining substantially intact during the cooking process."

To the contrary, the specification contains repeated generic and specific support for the limitation.

The Examiner's attention is, for example, drawn to the following quotes from the original specification:

page 1, lines 18-20 say:

"It is an object of the present invention to provide an edible truss which may be applied by a semi-automated process to bind the legs of a bird together.";

page 2, lines 15-18 say:

"Advantageously, the truss is maintained in position and in close contact throughout its length with the moist surface of the bird. This prevents the truss from becoming dry and/or brittle during cooking.";

page 4, lines 25-28 say:

"The truss 10 is maintained throughout its length in close contact with the moist surface of the chicken 14. This prevents the truss 10 from becoming dry and brittle during cooking.";

please refer to Example 3;

and especially page 8, lines 14-16 say:

"Nineteen out of the twenty trusses were resistant to the high oven temperatures and remained intact throughout the cooking process."

The rejection should clearly be withdrawn.

Dated: June 30, 2003

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Michael L. Dunn", with a stylized flourish at the end.
